PREFACE

Since 1958, developments in the agricultural trade of the European Economic Community (EEC)--the Common Market--have drawn worldwide interest. These developments are of particular interest to the United States, since it is the world's largest exporter of agricultural products, and the Common Market is its largest customer. Many inquiries received by the U.S. Department of Agriculture relate to the agricultural trade statistics of the Common Market.

Two comprehensive volumes of reference statistics on the EEC were published to date in Statistics on the European Community. Volume I, "Agricultural Trade and Finance," (ERS-Foreign-43), contains trade, financial monetary income, and population information through 1960. A supplement, issued in May 1964, updated these statistics in ERS-Foreign-43 through 1962. Volume II, "Agricultural Production and Consumption," (ERS-Foreign-46), contains data on acreage, yields, livestock numbers, output, prices, foreign requisites, and food consumption. More recently, a publication entitled Agricultural Trade of the European Economic Community: 1959-64, A Statistical Reference, ERS-Foreign-165, was issued in November 1966. This publication provided the EEC agricultural imports and exports by country or area of origin and destination by commodity. Current trade statistics between the United States and the Common Market countries are published in Foreign Agricultural Trade of the United States, a monthly publication of the Economic Research Service.

This report updates EEC agricultural trade statistics. The quantity and value of the commodities imported and exported listed in summary tables 1, 2, 3, and 4, show total trade of the EEC. The import and export tables following (tables 5, 6, 7, and 8), show the import and export value and quantity of EEC trade for selected commodities. Similar trade data are available for all commodities listed in the summary tables, as well as the individual EEC countries for the listed commodities. This information is on file in the Foreign Development and Trade Division, Economic Research Service, and is available for inspection. Requests by mail may be made for limited copies of the supporting data.

This report was prepared in the Trade Statistics and Analysis Branch, Foreign Development and Trade Division, under the direction of Dewain H. Rahe. Joseph R. Corley and Betty Case assisted in preparing the manuscript.

EXPLANATORY NOTES FOR TABLES

Trade data of the EEC were compiled from magnetic tapes released by the Organization for Economic Cooperation and Development (OECD). For the most part, they were compiled from 3-digit Standard International Trade Classification (SITC) numbers. A few commodities, such as meat of bovine animals, meat of swine, poultry, oranges, and fresh apples were compiled from 4-digit SITC numbers, and are included in the totals of the broader 3-digit classifications.

Data were compiled for the imports and exports of the EEC from 63 SITC classifications (both three and four digits) for 1961-67. The tables show trade of the EEC with itself and with other principal trading nations or trading groups. The trade groups or political unions contain the following countries:
